Chapitre 5 : Angle et parallèlisme-Exercices

Pour les exercices 1 à 6 : Trouver la mesure de l'angle α

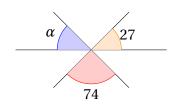

Exercice 1: (Representer)

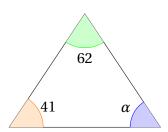

Exercice 2: (Representer)

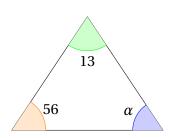

Exercice 3: (Representer)

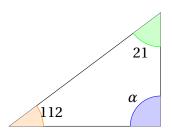

Exercice 4: (Representer)

Exercice 5: (Representer)

Exercice 6: (Representer)

Exercice 7: (Chercher)

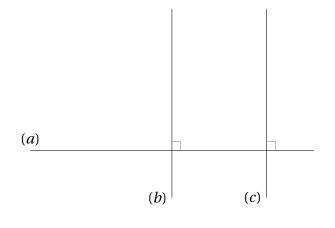

Soit trois points A, B et O tels que $(AO) \perp (OB)$. [CD] est le symétrique que [CD] par rapport à O. Démontrer que CB=AD.

Exercice 8: (Modeliser)

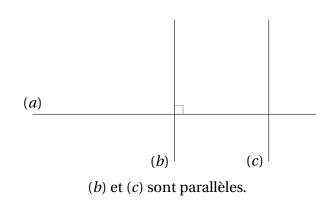

Construire une droite (d_1) , puis les droites (d_2) , (d_3) , (d_4) et (d_5) telles que : $(d_2) \perp (d_1)$, $(d_3)//(d_2)$, $(d_4)//(d_3)$ et $(d_5) \perp (d_4)$. Que peut-on dire de (d_1) et (d_5) ? Le justifier.

Pour les exercices 9 à 14 : Dire ce que l'on sait et ce que l'on peut deviner.

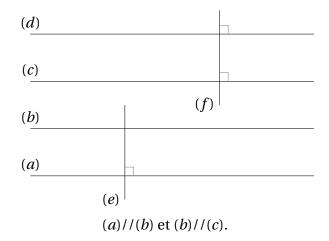

Exercice 9: (Raisonner)

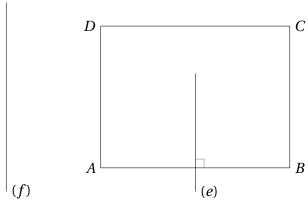

Exercice 10: (Raisonner)

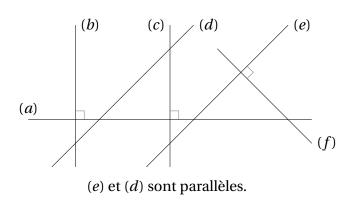

Exercice 12: (Raisonner)

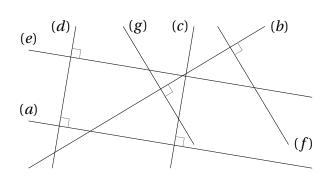

ABCD est un rectangle et (f)//(AD).

Exercice 13: (Raisonner)

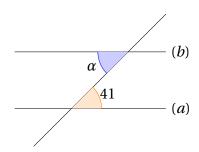

Exercice 14: (Raisonner)

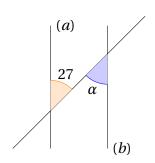

Pour les exercices 15 à 26 : Les droites (a) et (b) sont parallèles. Déterminer la mesure de l'angle α

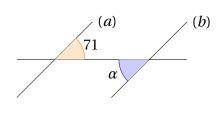

Exercice 15: (Representer)

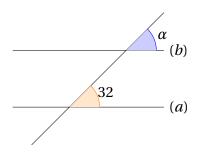

Exercice 16: (Representer)

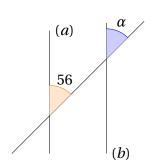

Exercice 17: (Representer)

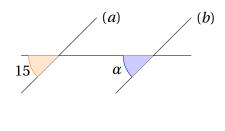

Exercice 18: (Representer)

Exercice 19: (Representer)

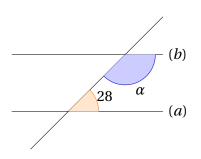

Exercice 20: (Representer)

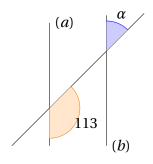

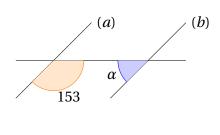

Exercice 21: (Representer)

Exercice 22: (Representer)

Exercice 23: (Representer)

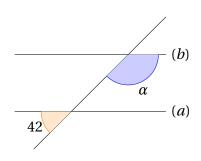

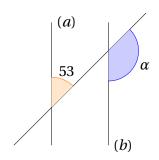

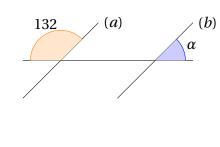

Exercice 24: (Representer)

Exercice 25: (Representer)

Exercice 26: (Representer)

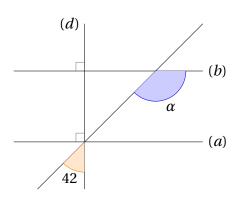

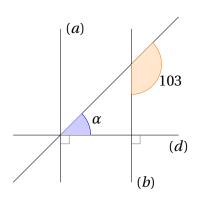

Pour les exercices 27 à 30 : Démontrer que (a) et (b) sont parallèles puis déterminer l'angle α

Exercice 27: (Raisonner)

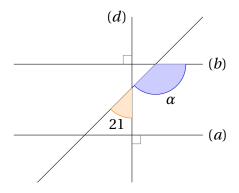

Exercice 28: (Raisonner)

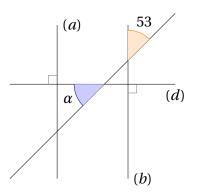

Exercice 29: (Raisonner)

Exercice 30: (Raisonner)

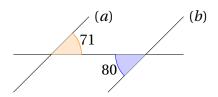

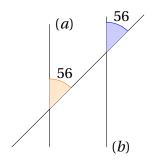

Pour les exercices 31 à 36 : Les droites (a) et (b) sont elles parallèles?

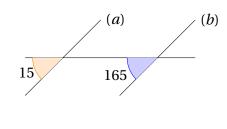

Exercice 31: (Representer)

Exercice 32: (Representer)

Exercice 33: (Representer)

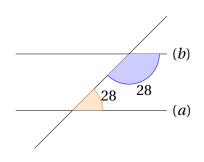

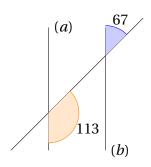

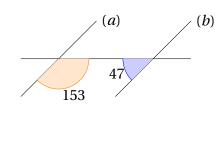

Exercice 34: (Representer)

Exercice 35: (Representer)

Exercice 36: (Representer)

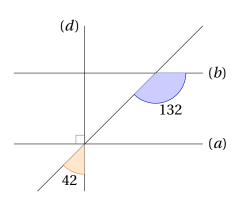

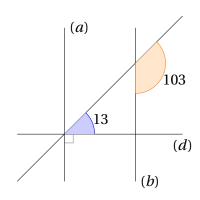

Pour les exercices 37 à 40 : Démontrer que (b) et (d) sont perpendiculaires.

Exercice 37: (Raisonner)

Exercice 38: (Raisonner)

Exercice 39: (Raisonner)

Exercice 40: (Raisonner)
